

1. Developer Setup & System Commands

Step 1: Install Python & C++ Build Tools

1. Download and install Python 3.11 (check 'Add Python to PATH').
2. Install Visual Studio C++ Build Tools (select 'Desktop development with C++').

Step 2: Install Required Libraries

Open your terminal/command prompt and run:

```
pip install pytsx3 wikipedia-api PyAutoGUI SpeechRecognition pyjokes requests PyQt5 psutil pyperclip google-genai deep-translator python-dotenv screen-brightness-control PyPDF2 dlib face-recognition opencv-python easyocr fastapi uvicorn
```

Step 3: Configure Environment Variables

Create a file named '.env' in the root directory and configure:

```
GEMINI_API_KEY=your_gemini_api_key
```

```
NEWS_API_KEY=your_news_key
```

```
KIRA_PORT=8000
```

Step 4: Run Kira Locally (Developer Mode)

Launch the GUI application:

```
python gui.py
```

Click 'INITIALIZE' to start the voice loops, local API server, and secure tunnel.

Step 5: Run Automated Tests

Test specific sub-systems using these commands:

- Companion Portal API: `python scratch/test_mobile_api.py`
- Interactive Loops: `python scratch/test_interactive_routing.py`
- Security Enrollment: `python scratch/test_security_enrollment.py`

Step 6: Compile to Standalone Executable (Kira.exe)

To package a single-file executable for distribution without Python dependencies:

```
pyinstaller --onefile --windowed --name "Kira" --add-data "Kira;Kira" --exclude-module torch gui.py
```

Step 7: Auto-Start on Windows Boot

Kira automatically creates a startup shortcut in Windows Startup folder (shell:startup).

Delete the shortcut to disable auto-start.

2. Core Features & Voice Commands (A-Z)

1. Continuous Voice & Wake Word Activation

- **Standby Mode:** Kira silently listens in the background. Just say **"Kira"** or **"Hey Kira"** to wake him up.

2. Smart Application & Window Control

- **Dynamic App Launcher:** Scans your Windows Start Menu to dynamically open *any* installed application.

3. Dual AI Engine (Online Gemini & Offline Ollama)

- **Online Mode (Gemini):** Ask complex questions and get intelligent answers powered by Gemini 2.5 Flash. Now enhanced with **conversation context** and **mood-aware personality**.

4. Face Detection Auto-Lock & Remote CCTV Guard

- **Webcam Security (Local Auto-Lock):** When security mode is active, Kira monitors your webcam in the background. If you step away and no authorized face is detected for 5 seconds, Kira instantly locks your Windows PC (**Win + L**) to secure your data.

5. Smart Screen Text Clicking (OCR)

- **Voice Mouse Control:** Tell Kira to click any text visible on your screen. Kira takes a screenshot, scans it using EasyOCR, finds the matching text, and moves the mouse to click it automatically.

6. Proactive Monitoring & Custom Macros

- **System Alerts:** A background thread monitors your PC and proactively speaks warnings if CPU usage exceeds 90% or battery drops below 20%.

7. WhatsApp Desktop Integration

- **Hands-Free Messaging:** Send WhatsApp messages completely via voice. Supports contact lookup from CSV.

8. YouTube & Media Controls

- **Direct YouTube Playback:** Plays videos directly.

- *Com

9. Screen Vision (Gemini AI)

- **AI-Powered Screen Reading:** Kira takes a screenshot of your PC and uses Gemini Vision AI to describe exactly what's on your screen.

- *Com

10. Dictation / Voice Typing Mode

- **Hands-Free Typing:** Enter a special mode where everything you say gets typed on your keyboard automatically (works inside Word, Notepad, Chrome, etc.).

- *Activ

11. System Health & Diagnostics

- **Full PC Status Report:** Get a voice report of your battery, CPU, RAM, and disk usage.

- *Com

12. Advanced Geolocation & Weather

- **Exact Location:** Finds your exact street address using Nominatim Maps API.

- *Com

13. PDF & Productivity Tools

- **Read PDF Aloud:** Reads any PDF in your Downloads folder.

- *Com

14. Hardware & Power Controls

- **Screen Brightness Control:**

- *Com

3. Command Reference Matrix

Core System & Application Commands (English)

Category	Voice Command	Description / Example
Wake Up	'Kira', 'Hey Kira'	Activates Kira from Standby mode
Standby	'Sleep', 'Go to standby', 'Stop listening'	Puts Kira back into Standby mode
System Info	'System status', 'How is my battery?'	Reports CPU, RAM, Disk, and Battery level
Hardware	'Set brightness to 50%', 'Increase volume', 'Mute'	Controls monitor brightness and audio volume
App Control	'Open Google Chrome', 'Close Chrome', 'Close Settings'	Launches installed apps or closes active windows
Web Search	'Search Wikipedia for Python', 'Search Google for cats'	Opens a browser with search results
Entertainment	'Play [Song] on YouTube', 'Download this YouTube video'	Controls media playback and downloads videos
Productivity	'Take a note', 'Read my PDF', 'Translate hello to French'	Dictates text, reads PDF files, or translates languages
Smart Vision	'What is on my screen?', 'Read my screen', 'Click [Text]'	Vision AI captures/reads screen or clicks text via OCR
WhatsApp	'Send a WhatsApp message'	Performs voice-guided WhatsApp messaging
Security Mode	'Enable security mode', 'Disable security mode'	Activates webcam-based face recognition locking
AI Mode	'Ask AI [your question]', 'Switch to offline AI'	Asks Gemini (online) or Llama3 (offline) a question
Typing Mode	'Start typing mode', 'Stop typing'	Enters dictation mode, typing everything you say
Shutdown	'Shutdown the PC', 'Restart the computer'	Powers off or restarts Windows

4. Multi-Language Romanized Speech Commands

Use these exact phrases for non-English voice controls.

Language Switch Overrides

- Switch to English: "Switch to English", "English mode", "English ma bol", "English mein bolo"
- Switch to Hindi: "Switch to Hindi", "Hindi mode", "Hindi ma bol", "Hindi mein bolo"
- Switch to Gujarati: "Switch to Gujarati", "Gujarati mode", "Gujarati ma bol", "Gujarati mein bolo"

Gujarati Voice Control Mapping

Gujarati	English Equivalent
'Ketla vage che'	What time is it?
'Havaman kevo che'	How's the weather?
'Geet vajav'	Play music
'Screenshot le'	Take screenshot
'AI ne puchh'	Ask AI

Hindi Voice Control Mapping

Hindi	English Equivalent
'Samay kya hai'	What time is it?
'Mausam batao'	Tell me the weather
'Gaana bajao'	Play music
'Note likho'	Take a note
'AI se pucho'	Ask AI
